About Me

Passionate and skilled front-end developer proficient in React, HTML, CSS, and JavaScript. Committed to creating visually appealing and user-friendly web applications. Quick learner with a focus on writing clean and maintainable code. Eager to contribute creativity and technical expertise to innovative projects. Actively seeking opportunities to kickstart my career in front-end development and make a positive impact in the industry.

Projects

E-commers website

- Developed a feature-rich e-commerce website using React, CSS, JavaScript, and HTML. The website offers a wide range of products across multiple categories and includes a seamless shopping experience with a shopping cart functionality.

GitHub Repository : <https://github.com/akshaypanampatta/E-Commers-App>

Netflix clone

- Developed a responsive clone of the Netflix website using HTML, CSS, JavaScript, and React to create a dynamic and user-friendly interface. Utilized the TMDb API to fetch movie data, including titles, posters, and trailers.

GitHub Repository : <https://github.com/akshaypanampatta/Netflix-Clone>

Weather App

- Developed a weather application that provides real-time weather information based on user location or search input. The app utilizes a weather API to fetch weather data for different locations and displays it in a user-friendly inter
