2021-2022

### About Me

Passionate and skilled front-end developer proficient in React, HTML, CSS, and JavaScript. Committed to creating visually appealing and user-friendly web applications. Quick learner with a focus on writing clean and maintainable code. Eager to contribute creativity and technical expertise to innovative projects. Actively seeking opportunities to kickstart my career in front-end development and make a positive impact in the industry.

### Projects

#### E-commers website

- Developed a feature-rich e-commerce website using React, CSS, JavaScript, and HTML. The website offers a wide range of products across multiple categories and includes a seamless shopping experience with a shopping cart functionality.

*Live Link :* <https://e-commers-app-fawn.vercel.app/>

#### Netflix clone

- Developed a responsive clone of the Netflix website using HTML, CSS, JavaScript, and React to create a dynamic and user-friendly interface. Utilized the TMDb API to fetch movie data, including titles, posters, and trailers.

*Live Link :* <https://netflix-clone-eight-roan-19.vercel.app/>

#### OLX-Clone

- This project is an OLX clone built using React.js and Firebase, providing a user-friendly platform for buying and selling items. With the ability to sign up and sign in, users can easily create accounts to start listing items for sale or browse and purchase items from other sellers.
